Task 2

Any answer that fits into the topic can be considered as correct.

1. control application. Use only as much chemical as needed, both in concentration and rate of application, to provide the desired effect. Be aware of weather conditions. Do not apply chemicals immediately prior to or during rainfall. Keep records of chemical compounds used.
2. Use extra caution near streams. Avoid applying chemicals where the road crosses a channel and for 20 m (60 ft) on either side. If necessary, provide a filter strip between the road and the stream. Prevent spillage near or into streams.
3. Disposal of excess chemical and container treatment. Clean and rinse equipment and storage containers in an area where waste water can be safely collected and treated
